

# SecurityScorecard MAX

Operationalize supply chain cybersecurity  
while optimizing resources and focus

## Challenge

CrowdStrike Falcon helps detect and respond to threats across your internal environment and endpoints. But attackers continue to evolve – targeting vendors and suppliers that fall outside traditional security controls.

With internal threat detection streamlined through CrowdStrike Falcon, it is time to extend that capability beyond the organization. SecurityScorecard's managed service for Supply Chain Detection and Response seamlessly integrates to detect, prioritize, and respond to third-party risks, turning threats into manageable security workflows.

## Solution

SecurityScorecard MAX is a managed service for supply chain detection and response that includes proactive threat hunting and continuous monitoring of your vendors. MAX helps organizations operationalize their supply chain cyber risk program through detection and response capabilities, AI and automated workflows, risk and threat telemetry, and elite cybersecurity experts to enhance your organization's security posture and protect against sophisticated threats.

Through the power of a unified security ecosystem and combining CrowdStrike Falcon and SecurityScorecard MAX, organizations can:

- **Extended Threat Intelligence:** Combine Falcon's endpoint telemetry with SecurityScorecard's third-party risk intelligence for richer threat context
- **Accelerated Incident Response:** Automatically correlate third-party vulnerabilities with internal threat data to speed up detection and remediation
- **Proactive Defense:** Identify supply chain threats before they impact endpoints, reducing lateral movement risks

### Assess

Instant vendor security analysis based on DFIR (digital forensic and incident response) principles

### Monitor

Constant visibility of supply chain cyber risks, including newly discovered zero-day threats

### Managed Solutions for SCDR

### Respond

Direct outreach to vendor teams to resolve issues and eliminate cyber risk

## Results

**75%**

Reduction in third-party breaches

**100%**

Remediation rate for zero-day incidents

**3x**

Reduction in high risk suppliers

**2x**

Issue remediation rate increase

# Key Solution Capabilities

- **Identify cyber risks:** MAX identifies risky vendors using a likelihood-of-incident model that assesses vulnerabilities across 17 security categories to determine issues likely to result in a security incident
- **Remediate critical issues:** Leveraging SecurityScorecard's world-class data and technology, MAX identifies, prioritizes, and addresses critical vulnerabilities across your supply chain
- **Continuous vendor monitoring:** Using SecurityScorecard's security data, MAX continuously monitors vendors to determine if their cyber hygiene is improving or declining
- **Streamlined vendor communications:** MAX simplifies vendor management and communication by handling all security-related issues directly with vendors

## Business Value

### Holistic Threat Visibility

Centralized view of internal (endpoints, incidents) and external (vendors, supply chain) risks

### Faster Incident Response

Automated detection-to-response workflows across both internal and third-party incidents

### Operational Efficiency

Reduced manual effort through automated ticketing, alerts, and compliance reporting

### Reduced Third-Party Risk Exposure

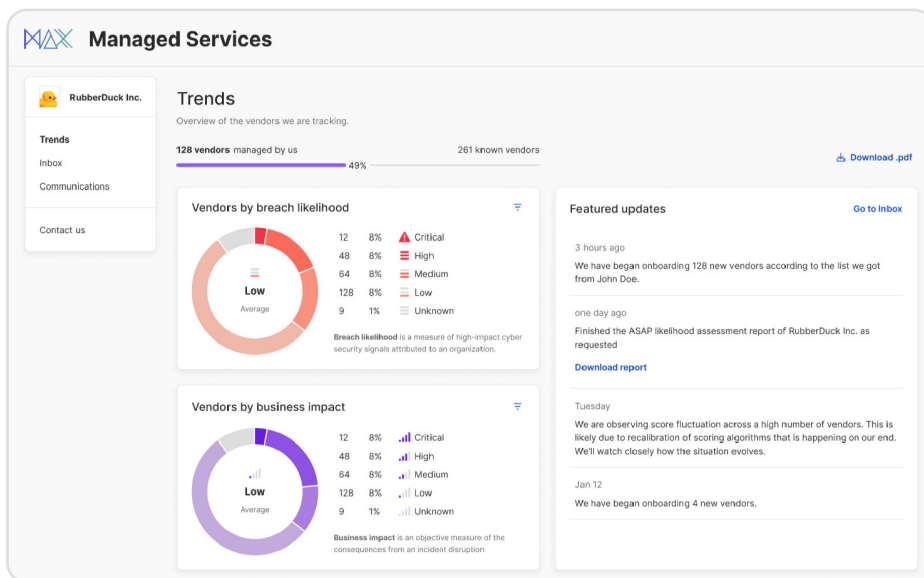

Proactive identification and mitigation of supply chain vulnerabilities before they cause harm

### Cost Savings

Lower breach-related costs and resource allocation through automation and early detection

### Improved Compliance Tracking and Reporting

Leverage continuous monitoring for compliance frameworks (NIST, GDPR, ISO, etc.)

## About SecurityScorecard

SecurityScorecard is the global leader in supply chain detection and response and the only service with millions of organizations continuously rated. Thousands of organizations leverage our security data and intelligence for self-monitoring, third-party risk management, board reporting, and cyber insurance underwriting. But we don't stop there. Through a customer-centric, solution-based commitment to our partners, we are transforming the digital landscape and building a path toward resilience. For more information, visit [securityscorecard.com](https://securityscorecard.com).

## About CrowdStrike

CrowdStrike® Inc. (Nasdaq: CRWD), a global cybersecurity leader, is redefining security for the cloud era with an endpoint protection platform built from the ground up to stop breaches. The CrowdStrike Falcon® platform's single lightweight-agent architecture leverages cloud-scale artificial intelligence (AI) and offers real-time protection and visibility across the enterprise, preventing attacks on endpoints on or off the network. Powered by the proprietary CrowdStrike Threat Graph®, CrowdStrike Falcon correlates over two trillion endpoint-related events per week in real time from across the globe, fueling one of the world's most advanced data platforms for security.

With CrowdStrike, customers benefit from better protection, better performance and immediate time-to-value delivered by the cloud-native Falcon platform.

There's only one thing to remember about CrowdStrike: We stop breaches.
