CROWDSTRIKE

FALCON SPOTLIGHT

A new approach to vulnerability assessment

The fastest and simplest solution to decrease risk and exposure, close security gaps and be better prepared to respond to attacks

FALCON SPOTLIGHT

SCANLESS INSTANT VULNERABILITY ASSESSMENT

CrowdStrike® Falcon Spotlight™ offers security teams a real-time assessment of vulnerability exposure on their endpoints that is always current. Falcon Spotlight's native integration into the CrowdStrike Falcon® platform enables customers to operate vulnerability assessment within a complete endpoint protection framework. Falcon Spotlight adds preparation and readiness to the unparalleled prevention, detection and response provided by the Falcon platform, resulting in a stronger security posture and unprecedented breach protection.

- **Integrated Protection:** Spotlight is a key part of CrowdStrike's comprehensive and unified endpoint protection platform. With Spotlight and the Falcon platform, not only can you see your security gaps, you see which gaps your adversary is targeting, arming you with the proactive protection you need to block advanced attacks.

- **Comprehensive Visibility:** Spotlight requires no scanners to deploy and manage and no new agents — just turn it on and start seeing results. Spotlight gives you visibility across your enterprise, whether endpoints are physical or virtual, on- or off-premises, or on-the-move.

You receive unparalleled visibility into vulnerabilities across your distributed enterprise without compromise.

- **Effortless:** Spotlight delivers always up-to-date information seamlessly, putting it into the hands of security analysts. This helps you improve response time and reduces the effort required to understand your security posture and become more proactive.

- **Zero-impact:** CrowdStrike's cloud-native architecture enables constant visibility into endpoint vulnerabilities without the need for cumbersome and resource-intensive network or host scans.

KEY BENEFITS

Falcon Spotlight is the industry's first scan-less endpoint vulnerability assessment solution. Built on the Falcon platform, it delivers timely, zero-impact assessments of endpoint security posture and provides on-demand access to the results, enabling security teams to make better decisions, faster.

Provides holistic protection that bridges the gap between vulnerability assessment and threat prevention

Offers seamless cloud-native deployment requiring no additional agents or new infrastructure

Delivers timely, up-to-date knowledge on demand

Provides zero-impact, scan-less assessment

KEY PRODUCT CAPABILITIES

Falcon Spotlight solves the challenges that plague traditional vulnerability assessment and management solutions by delivering the following benefits:

SEAMLESS INTEGRATION WITH THE FALCON PLATFORM

Connects the dots
Tight integration with other Falcon modules means you can quickly pivot between vulnerability information, incidents details and endpoint activities, not only in real time but also historically.

Prevent while you patch
The Falcon platform mitigates the risk from vulnerabilities that cannot be patched quickly by preventing and detecting exploit attempts as well as post exploitation activities. This buys you precious time to patch your systems against future attacks.

NO SCANNERS, NEW AGENTS OR SCANS

Eliminate scanning
Falcon Spotlight uses the Falcon agent to continuously monitor the vulnerability status of endpoints and stream data to the cloud, eliminating the need for scheduled scans while still providing complete visibility into vulnerabilities.

Visibility everywhere
Spotlight monitors all endpoints via the Falcon sensor, whether on- or off-network, on-premises, off-premises or in the cloud and on both physical and virtual endpoints.

Zero impact on performance
Vulnerability management is scan-less and vulnerabilities are identified in the cloud with no additional impact to endpoints or the network.

FRICTIONLESS ACCESS TO VULNERABILITY DATA

Real-time dashboard and search
Falcon Spotlight makes data easily available to security analysts through a series of intuitive dashboards and real-time search. Legacy solutions lock critical information up in silos and thousand-page reports. Spotlight unleashes this information in real time — when and where it's needed.

Enhance existing vulnerability management solutions
Falcon Spotlight adds deeper visibility and provides threat context, enabling security teams to see both the presence of a vulnerability and evidence of exploitation attempts in their environments.

CLOUD-DELIVERED

Easy deployment
As part of the Falcon platform, Falcon Spotlight does not require the installation of additional agents, management infrastructure or management consoles, making deployment easy and efficient.

Immediately operational
Falcon Spotlight can be deployed instantly for unrivaled time-to-value. As soon as it is installed, it hits the ground running, monitoring and identifying vulnerabilities across your organization without requiring reboots, query writing, staging or complex configuration.

Seamless, cloud-based protection
Leveraging CrowdStrike's cloud-native architecture, Falcon Spotlight gives security teams the power to protect systems — whether those systems are on-premises, off-network or in a cloud environment.

PREVENTATIVE SECURITY AND BEYOND

Security starts with shining the light on where you are vulnerable, so you can close the gaps and be as prepared as possible to face threats. Falcon Spotlight has been designed to provide the visibility and actionable information that security and IT teams need to address threats successfully.

ABOUT CROWDSTRIKE:

CrowdStrike is the leader in cloud delivered endpoint protection. The CrowdStrike Falcon platform offers instant visibility and protection across the enterprise and prevents attacks on endpoints on or off the network. Falcon seamlessly unifies next-generation AV with best in-class endpoint detection and response, backed by 24/7 managed hunting. There's much more to the story of how Falcon has redefined endpoint protection but there's only one thing to remember about CrowdStrike: We stop breaches.
