Integrated Threat Intelligence Providing Visibility into Events that Matter to You

Moving to the cloud does not require sacrificing visibility or an understanding of the adversaries that are out there trying to penetrate your organization and compromise your critical applications and data. Integrated threat intelligence, powered by CrowdStrike, puts control back in your hands, providing real-time security intelligence against sophisticated and persistent attacks, whether by cyber criminals, corporate spies, spammers, nation states or hacktivists.

You've already invested a great deal in your security infrastructure to prevent, detect, and respond to cybersecurity attacks. Yet you may feel as if you're still constantly putting out fires and are still uncertain about your current cybersecurity posture.

You're looking for ways to be more proactive, more effective, and more strategic about your defenses, without having to "rip and replace" all your existing defense infrastructure. You need the right cyber security intelligence, delivered at the right time, in the right way to help you stop breaches.

That is exactly what Sumo Logic's integrated threat intelligence delivers. Matching on IOCs like IP address, domain names, URL, email addresses, MD5 hashes and more, the solution is bundled into Sumo's Enterprise and Professional editions at no extra cost.

Threat Intelligence Overview Dashboard

Supercharge your Threat Defenses
Consume threat intelligence directly into your enterprise systems in real time to increase velocity & accuracy of threat detection.
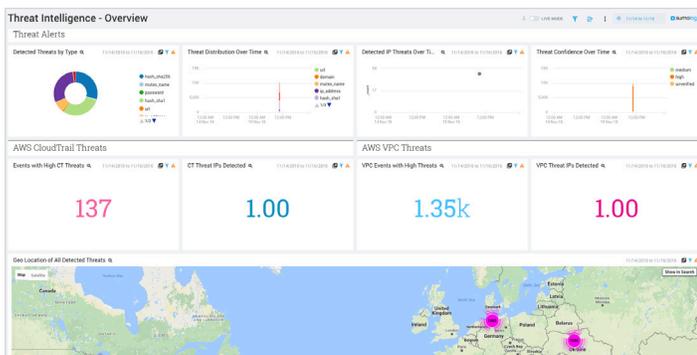

Be Informed, Not Overwhelmed
Real-time visualizations of IOCs in your environment, with searchable queries via an intuitive web interface.

Achieve Proactive Security
Know which adversaries may be targeting your assets and organization, thanks to strategic, operational and technical reporting and alerts.

About Sumo Logic

Sumo Logic is a secure, cloud-native, machine data analytics service, delivering real-time, continuous intelligence from structured, semi-structured and unstructured data across the entire application lifecycle and stack. More than 1,200 customers around the globe rely on Sumo Logic for the analytics and insights to build, run and secure their modern applications and cloud infrastructures.
